

TerraTec

Portable MP3/CD Player

TerraTec M3Po go – Rock around the clock!

The M3Po go is a latest generation CD-based MP3 Player.

Your mobile MP3 Jukebox – anywhere, anytime. It allows you to record up to 12 hours of music on a standard CD-R/RW very inexpensively. This puts the M3Po go way ahead of any solid-state player when it comes to capacity and price of storage medium.

The Easy Directory Access data management system (EDA) with its special user concept is provided to help you navigate through this sea of audio data. Within a few seconds the sounds of your favorite songs will reach your eardrums and like the 49 other songs it can be bookmarked in your personal "Hit list" via the Bookmarking function.

Your small sports-friendly device knows what is playing and the large graphic LCD display provides ample information about the status, title, and artist as well as other ID3 info. Smooth moving text for extra-long messages is also available.

Its suitability for all terrains is unquestionable, as the Anti-Shock Buffer fully compensates for any dropout. But there is more: The CD drive is only used for a short time to fill this buffer – this saves power and therefore money. And to top it all: Standard car connection kits and adapter cassettes make your car CD changer a thing of the past.

Naturally your "mini" can be used normally as a standard CD audio player. The high-quality neck-held headphones which actually do sit on your neck are anything but uncomfortable and guarantee undisturbed listening pleasure. With the help of the line-out connection and audio cable, the M3Po go also operates beautifully in stationary mode with your home stereo. Go M3Po go 'n rock it ...

TerraTec

M3Po go

Portable MP3/CD Player
